## PROJECTS

---

- **Soundry Web Application**  
Full Stack Music Streaming Web Application [Github link](#)  
Tech Stack(Django, HTML, CSS, Bootstrap, JavaScript, SQLite)  
Developed a full-stack music streaming platform with user login, profile management, and seamless playback. Integrated Django authentication and email support for user queries and contact forms. Ensured smooth user experience with secure data handling and efficient backend performance.

- **Student Library Management System**

Java Project [Github link](#)

Tech Stack(Java, SpringBoot, MySQL, JPA, Hibernate)

Developed a Java backend application for managing student and library operations, including APIs for registration, book transactions, and inventory. Tested all endpoints using Postman for accuracy and reliability.

- **CSE Learning Hub Web Application**

Frontend Project [Github link](#)

Tech Stack(HTML,CSS,JavaScript)

I developed a web application by using frontend technologies that provides B.Tech academic subject materials, previous question papers and technical resources. This platform became widely used among students in my college.
